

Key Working Group Comments and Observations

1. **The main problems today are structural barriers to voting and administrative error.** Mr. Perez observed that, in accordance with the research, the biggest issues today are structural barriers to voting, not stealing votes. Election administrators share this view. Election fraud is negligible, and to the extent it occurs, it needs to be prosecuted with stronger criminal laws. The biggest problem is properly preparing people, which is the responsibility of election administrators.
2. **Most fraud and intimidation is happening outside of the polling place.** Mr. Greenbaum observed that with respect to both voter fraud and voter suppression, such as deceptive practices and tearing up voter registration forms, most of that is taking place outside of the polling place.
3. **This issue cannot be addressed through one study or one methodology alone.** Mr. Weinberg observed that since there is such a variety in types of fraud and intimidation, one solution will not fit all. It will be impossible to obtain data or resolve any of these problems through a single method.
4. **The preliminary research conducted for this project is extremely valuable.** Several of the working group members complimented the quality of the research done and although it is only preliminary, thought it would be useful and informative in the immediate future.
5. **The Department of Justice is exploring expanding its reach over voter suppression activities.** In the context of the conversation about defining voter intimidation, Mr. Donsanto pointed out that while voter intimidation was strictly defined by the criminal law, his section is beginning to explore the slightly different concept of vote suppression, and how to pursue it. He mentioned the phone-jamming case in New Hampshire as an initial success in this effort. He noted that he believes that vote suppression in the form of deceptive practices ought to be a crime and the section is exploring ways to go after it within the existing statutory construct. Mr. Bauer raised the example of a party sending people dressed in paramilitary outfits to yell at people as they go to the polls, telling them they have to show identification. Mr. Donsanto said that under the laws he has to work with today, such activity is not considered corrupt. He said that his lawyers are trying to “bend” the current laws to address aggravated cases of vote suppression, and the phone-jamming case is an example of that. Mr. Donsanto said that within the Department, the term vote “suppression” and translating it into a crime is a “work in progress.”
6. **Registration fraud does not translate into vote fraud.** Ms. Rogers, Mr. Donsanto and others stated that although phony voter registration applications turned in by people being paid by the form was a problem, it has not been found

in their experience to lead to fraudulent voters at the polls. Ms. Rogers said such people were motivated by money, not defrauding the election.

7. **Handling of voter fraud and intimidation complaints varies widely across states and localities.** Ms. Rogers and others observed that every state has its own process for intake and review of complaints of fraud and intimidation, and that procedures often vary within states. The amount of authority secretaries of state have to address such problems also is different in every state. Mr. Weinberg stated he believed that most secretaries of state did not have authority to do anything about these matters. Participants discussed whether secretaries ought to be given greater authority so as to centralize the process, as HAVA has mandated in other areas.

Working Group Concerns

1. Mr. Rokita questioned whether the purpose of the present project ought to be on assessing the level of fraud and where it is, rather than on developing methods for making such measurements. He believed that methodology should be the focus, “rather than opinions of interviewees.” He was concerned that the EAC would be in a position of “adding to the universe of opinions.”
2. Mr. Rokita questioned whether the “opinions” accumulated in the research “is a fair sampling of what’s out there.” Ms. Wang responded that one of the purposes of the research was to explore whether there is a method available to actually quantify in some way how much fraud there is and where it is occurring in the electoral process. Mr. Rokita replied that “Maybe at the end of the day we stop spending taxpayer money or it’s going to be too much to spend to find that kind of data. Otherwise, we will stop it here and recognize there is a huge difference of opinion on that issue of fraud, when it occurs is obtainable, and that would possibly be a conclusion of the EAC.” Ms. Sims responded that she thought it would be possible to get better statistics on fraud and there might be a way of “identifying at this point certain parts in the election process that are more vulnerable, that we should be addressing.”
3. Mr. Rokita stated that, “We’re not sure that fraud at the polling place doesn’t exist. We can’t conclude that.”
4. Mr. Rokita expressed concern about working with a political scientist. He believes that the “EAC needs to be very careful in who they select, because all the time and effort and money that’s been spent up to date and would be spent in the future could be invalidated by a wrong selection in the eyes of some group.”
